Festival Town: curriculum map and sample teacher guide

Nov 5, 2026 · @Justin

How to use this map

Each of Festival Town's 15 activities is mapped below to what pupils study from Nursery 2 to Primary 2, with a sample lesson to show how a class uses it. It is written for heads of school, class teachers and curriculum leads.

- **Subjects** follow the revised basic education curriculum (NERDC approved subject list, 8 September 2025). Primary 1 to 3 take Mathematics, Basic Science and Creative Arts, among others. Basic Digital Literacy starts in Primary 4.
- **Topics** follow a typical Primary 1 scheme of work for Mathematics and Basic Science. Where an activity goes beyond the Primary 1 scheme, the map says so.
- **Class levels:** N2 = Nursery 2 (about age 4 to 5), P1 = Primary 1 (about 5 to 6), P2 = Primary 2 (about 6 to 7). Ages vary a little between schools.
- **Time:** each place has three activities and takes about 10 minutes of play.

The map: 15 activities

Twelve of the 15 activities sit inside the Primary 1 scheme; three (equal sharing, life cycles, repeating patterns) reach just beyond it and suit Nursery 2 or Primary 2.

Place	Activity	What the child does	Learning objective	Subject and scheme topic	Best for
Market Street	Toy stall	Wakes sleeping teddies one at a time, counting as they go	Count objects to 10, one number for each object	Mathematics: counting 1 to 10 (P1, term 1)	N2, P1
Market Street	Mango stall	Packs the number of mangoes asked for, then adds green ones to make the total	Count out a set and add on to a total within 10	Mathematics: addition, sums up to 10 (P1, term 1)	P1
Market Street	Puff-puff	Shares puff-puff so every plate gets the same	Share equally into groups (early division)	Mathematics: beyond the P1 scheme	P1 stretch, P2

Place	Activity	What the child does	Learning objective	Subject and scheme topic	Best for
Grandma's Farm	Bean garden	Waters a droopy bean, moves the cloud off the sun, finds which bean grows best	Plants need water and light to grow	Basic Science: living things; water (P1, term 1)	P1, P2
Grandma's Farm	Life cycles	Puts bean, hen and butterfly pictures in order, first to last	Living things grow and change in stages	Basic Science: living things (P1, term 1); life cycles go beyond P1	P1, P2
Grandma's Farm	Feeding time	Gives the goat, hen and rabbit the food each eats, then sorts living from not living	Animals need food; tell living from non-living things	Basic Science: living things; non-living things (P1, term 1)	N2, P1
Computer Village	Code Bolt	Taps arrows in order and presses Go so Bolt the robot reaches his battery	Give step-by-step instructions in the right order	Basic Science: concept of technology (P1, term 3); groundwork for Basic Digital Literacy (P4)	P1, P2
Computer Village	Fix the bug	Watches Bolt go wrong, finds the arrow that caused it and swaps it	Find and fix a mistake in a sequence	Basic Science: concept of technology (P1, term 3)	P1, P2
Computer Village	Light it up	Fills the gap in a wire so the bulb lights	Electricity needs a complete loop	Basic Science: energy, light energy (P1, term 1)	P2
Builders' Yard	Float or sink	Guesses, drops each object in the river, then builds a raft that carries Zizi	Predict, then test which objects float	Basic Science: water; transport by water (P1, terms 1 and 3)	P1, P2
Builders' Yard	Bridge builder	Counts the spaces in a gap and finds the plank, or two planks, that fit	Measure a gap in units; make a length from two parts	Mathematics: length; addition (P1, term 3)	P1, P2
Builders' Yard	Strong shapes	Builds a tower to the flag line and tests which frame stays up in the wind	Triangles make strong frames; test and improve a build	Mathematics: two-dimensional shapes (P1, term 2)	P1, P2
Adire Workshop	Stamp the cloth	Keeps a circle, star, triangle pattern going and spots the stamp that broke it	Continue and correct a repeating pattern	Mathematics: patterns (before the P1 scheme); Creative Arts	N2, P1

Place	Activity	What the child does	Learning objective	Subject and scheme topic	Best for
Adire Workshop	Measure ribbons	Lays buttons along a ribbon to measure it, then cuts a piece the right length	Measure length with non-standard units	Mathematics: length (P1, term 3)	P1, P2
Adire Workshop	Shape kites	Finds the triangles, sorts shapes by their sides, makes a kite the same on both sides	Name 2D shapes by their sides; symmetry	Mathematics: two-dimensional shapes (P1, term 2); Creative Arts	P1, P2

Running Festival Town on a classroom TV

One screen, one remote and a clear routine let a whole class play together. The teacher leads the story; pupils take turns with the remote while everyone else answers out loud.

1. **Set up before the lesson.** Use a TV with the Festival Town app and its remote, a laptop with a projector, or any browser at motionplaylabs.com/festival-town/game. Open the place you will use once before class so its pictures and voices load. Turn the sound up.
2. **Name a remote captain.** One pupil holds the remote for one task, then passes it on. Arrows move, OK chooses, Back goes back.
3. **Everyone answers, not just the captain.** The class counts aloud with the voice, shows answers on fingers, and gives thumbs up or down before the captain presses OK.
4. **Use the hints.** A wrong choice brings a hint from Zizi, not a buzzer. Pause and ask the class what to try next before the next press.
5. **Keep play short.** One place is about 10 minutes of play. Put talk before it and hands-on work with real objects after it.
6. **Groups and tablets.** With tablets or phones, groups of three or four take turns. Progress saves in the browser on that device.

The game collects no personal data from children and shows no adverts. Settings sit behind a grown-up question.

Sample lesson: Market Street, Primary 1 Mathematics (35 minutes)

Pupils count out sets up to 10 and add on to make a total, first in the game, then with real objects.

- **Objective:** by the end, pupils can count out up to 10 objects and add on to make a total within 10.
- **Scheme link:** counting 1 to 10; addition with sums up to 10 (Primary 1, first term).
- **Materials:** classroom TV and remote (or laptop and projector); 10 bottle tops or seeds per pair; a tray or basket per pair.
- **Words to use:** count, how many, more, add, altogether, total.

Time	Stage	What happens
0 to 5 min	Warm up	Count 1 to 10 aloud, then back from 10. Show each number on fingers.
5 to 8 min	The story	“Mama Bisi needs mangoes for the festival. Can we help her?” Pick a remote captain.
8 to 18 min	Play	Toy stall, then Mango stall. The class counts aloud with each tap. Before OK, ask: “Is that the right number? How do you know?” Change captain each round.
18 to 28 min	Hands on	In pairs: “Put 4 bottle tops in the tray. Add 2 more. How many altogether?” Call four sums; pairs say the answer together.
28 to 33 min	Check	Each pupil shows the answer to two spoken sums on fingers. Note who counts each object once and who guesses.
33 to 35 min	Close	“What did we help Mama Bisi with?” Home link: count 10 things in your kitchen tonight.

Support: count to 5 first and touch each object as you say its number. **Stretch:** play Puff-puff and share 6 between 2 plates, then 3 plates.

Checking learning

A one-minute check per place tells a teacher whether the play carried over to real objects. The full before-and-after skills check is in the pilot plan.

Place	Quick check after play
Market Street	Give 7 bottle tops: “Show me 5. Add 2. How many now?”

Place	Quick check after play
Grandma's Farm	"What does a plant need to grow?" Pupil names water and light.
Computer Village	Pupil gives two spoken steps to guide a friend to the door.
Builders' Yard	Pupil predicts, then tests, whether a stone and a cork float.
Adire Workshop	Pupil continues a circle, star, circle, star pattern with drawings.

What the full guide adds

- One lesson plan for each of the five places, plus printable activity sheets.
- Festival Night activities, mapped the same way, when Season 2 is released.
- Objective-level references to the 2025 national scheme of work for Primary 1 to 3, checked against NERDC documents.
