Click a title to go to that slide.

THE PROBLEM

# The learning gap opens in the early years

**70%+**

of Nigerian 10-year-olds cannot read and understand a simple sentence or do basic number tasks

**37m**

of the 50.7 million children aged 7 to 14 cannot read and understand a simple text

**60**

pupils per primary classroom on average, against 38 in pre-primary

**Skills missed in the first three years of school make later learning harder.** Ages 4 to 7 is the window Festival Town is built for.

Sources: World Bank figures reported by UNICEF Nigeria and BusinessDay. Full list on the Sources slide.

WHY PRINT FALLS SHORT

# A workbook cannot speak to a child who cannot read yet

| | |
|---|---|
| **The page is silent** | Children of 4 to 7 learn by listening and doing. Most cannot yet read the instructions in their own workbook. |
| **Mistakes wait** | With about 60 pupils in a room, a wrong answer is often found at marking, after the child has moved on. |
| **Copies wear thin** | An estimated 75% of books sold in Nigeria are illegal copies, often faded and out of date. |

Sources: World Bank via BusinessDay (class size); Nigerian Publishers Association, in an IPA report (piracy).

WHY NOW

# Three reasons to start this school year

01

## Digital skills are now in the curriculum

The curriculum in force since 2025/26 adds Basic Digital Literacy from Primary 4 and makes it compulsory at junior secondary.

02

## Schools are changing books anyway

At the 2025 publishers' conference, a rollout from Primary One in 2026/27 was proposed. Book lists are already moving.

03

## Private schools lead basic education

91,252 of Nigeria's 171,027 basic schools were private in 2022. Private schools drove the growth since 2018.

Sources: NERDC subject list (Sept 2025); Nigerian Publishers Association, 2025 conference; UBEC.

THE PRODUCT

# Festival Town: a story game for ages 4 to 7

The town’s big street festival is on Saturday. The child picks Ada, Tobi or Amina and helps five places get ready. Every job is a maths, science, technology or engineering task.

SEASON 1

# Five places, fifteen activities

Maths

## Market Street

with Mama Bisi

- Count the sleepy teddies
- Pack the right number of mangoes
- Share puff-puff equally

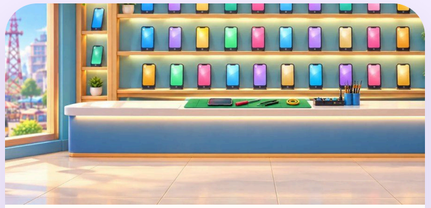

Science

## Grandma's Farm

with Grandma

- Find what makes a bean grow
- Put life cycles in order
- Sort living and not living

Technology

## Computer Village

with Sister Ngozi

- Code Bolt the robot
- Find and fix the bug
- Close the circuit

Engineering

## Builders' Yard

with Engineer Bayo

- Float or sink, then build a raft
- Fit planks to the gap
- Build a tower that stands

Maths

## Adire Workshop

with Aunty Kemi

- Continue the pattern
- Measure the ribbon
- Find shapes, make a kite

IN THE CLASSROOM

# One TV and a remote run the whole class

Festival Town plays on the classroom TV with its remote, or on a laptop and projector. Pupils take turns at the front while the class counts, predicts and checks together.

**Works today on a TV with remote, laptop, tablet and phone**

Illustrative classroom. The screen shows the live game.

DESIGN RULES

# Designed for four– to seven–year–olds

### No reading needed

Every instruction is spoken in clear English.

### A hint, not a buzzer

A wrong tap brings help from Zizi, then another try.

### Ten minutes a place

Three short activities fit one lesson slot.

### Set in a Nigerian town

A market, a farm, a phone shop, a yard, an adire workshop.

### No ads, no child data

No adverts, no child accounts, a grown-up gate.

### Keeps playing offline

Once a place is opened, it plays again without data.

CURRICULUM FIT

# Where it meets the curriculum

| Place | Strand | What pupils practise | Primary 1–3 subject |
|---|---|---|---|
| Market Street | Maths | Counting to 10, adding on, equal sharing | Mathematics |
| Grandma’s Farm | Science | What plants need, life cycles, living things | Basic Science |
| Computer Village | Technology | Sequencing steps, debugging, simple circuits | Basic Science |
| Builders’ Yard | Engineering | Float or sink, measuring a gap, strong shapes | Basic Science |
| Adire Workshop | Maths | Patterns, measuring length, shapes, symmetry | Mathematics; Creative Arts |

The coding activities lay groundwork for Basic Digital Literacy, which starts in Primary 4. The teacher guide maps every activity to its learning objective.

Subject names: revised basic education curriculum, NERDC approved subject list (8 September 2025).

THE EVIDENCE

# What the research says about learning games

86 STUDIES REVIEWED

**0.62**

Average effect of game-based STEM learning over regular teaching. A medium to large effect.

## Game parts tied to the lesson work best

In the same review, features added for the content beat features added only for fun.

## Pictures and sound that match help most

Animation and sound that match a story helped young children understand it and learn words, most of all children with less support at home. Extra games and hotspots distracted them.

**Our rule: every tap is the lesson**

Sources: Gui et al., International Journal of STEM Education (2023); Takacs, Swart and Bus, Review of Educational Research (2015).

BEYOND FESTIVAL TOWN

# Any published textbook can work this way

Festival Town is one sample. We take a book a school or publisher already uses, keep every learning objective, and rebuild it so a child can learn from it on a screen.

THE METHOD

# How we convert a textbook

**1**

### Audit

Objectives, exercises, art, audio, rights, and how teachers use it now.

**2**

### Map

Each learning objective gets a place. Nothing in the print edition is dropped.

**3**

### Choose

Story game, read-along, practice pack, class lessons, or a mix.

**4**

### Build

Script, voices, 3D art and activities. Every tap practises an objective.

**5**

### Prove

Pupils test it. We compare scores before and after, then release.

Festival Town is a sample of this work: learning objectives turned into a voiced, 3D story game that runs on any screen.

FORMATS

# The audit decides the format

We choose one format or combine several. The choice follows the book, the age group and the devices a school has.

| Format | What the child gets | Best for |
|---|---|---|
| **Story game** | The book becomes a world the child helps, fully voiced | Early maths and science |
| **Narrated read-along** | Each page voiced and animated, words lit as read | Storybooks and readers |
| **Practice pack** | Book exercises with spoken feedback on every answer | Workbooks |
| **Class TV lessons** | Teacher-led screens a whole class plays with one remote | Large classes |
| **Teacher companion** | Lesson plans, slides and sheets matched to each unit | Every format |

**Highlighted:** Festival Town is the story game format.

SAME KNOWLEDGE, AND MORE

# What the interactive edition adds

| | Print textbook | Interactive edition |
|---|---|---|
| **Learning objectives** | All of them | **All of them, mapped one to one** |
| **A child who cannot read yet** | Needs an adult to read aloud | **Every instruction spoken** |
| **Feedback** | When the teacher marks | **On every answer, with a hint** |
| **Practice** | Fixed exercises | **Repeats until it clicks** |
| **Curriculum changes** | Reprint and redistribute | **Update once, on every device** |
| **Copies** | Photocopied and pirated | **Licensed to each school** |
| **Progress** | In exercise books | **Per pupil, each term*** |

* Per-pupil progress arrives with the school release.

THE SCHOOL LICENCE

# What the school licence includes

Live

### Season 1 on every screen

Five places and 15 activities on TV, laptop, tablet and phone.

In build

### Festival Night, new worlds

Season 2 and every world after it, included as each one is released.

From day one

### Onboarding and support

A setup session for teachers and a named contact for the school.

With school release

### Teacher guide

A curriculum map and a lesson plan for each activity.

With school release

### Pupil logins for home

Each pupil carries on at home, on the family phone or TV.

With school release

### Termly progress summary

What each class has played and mastered, every term.

**Season 1 stays free for any family.** The licence adds what a school needs to teach with it.

THE LICENCE FEE

# ₦1,500 per pupil per term

Billed each term. Schools can show it on the fee bill as an e-learning line.

## ₦180,000

a term for a school licensing 120 pupils, Nursery 1 to Primary 2

## Under 3%

of a budget private school's term fee of ₦60,000 to ₦120,000

## ₦0 to try

Season 1 is free, and a four-week pilot in one class is free

Fee range: SchoolRegistry.ng school fees guide, 2026 (budget urban nursery and primary).

GETTING STARTED

# How a school starts

STEP 1

## Today

Play Season 1 free on the class TV or a laptop.

STEP 2

## Weeks 1 to 4

A free pilot in one class, with a skills check before and after.

STEP 3

## Jan 2027 term

License the classes you choose, billed per term.

STEP 4

## Every term

New content, a progress summary and a review call.

**Founding schools:** the first 50 schools to sign keep ₦1,500 per pupil per term for three years.

THE MARKET

# 3.4 million children in private early years

**PUPILS IN REACH**

**≈3.4m**

children aged about 4 to 7 in private nursery and early primary classes

| | |
|---|---|
| Private primary pupils, 2018/19 | 5.7m |
| Of these, Primary 1 and 2 (one third) | 1.9m |
| Private pre-primary pupils, 2016 | 1.46m |
| **Early-years pupils in private classes** | **≈3.4m** |
| **Yearly value at ₦4,500 per pupil** | **≈₦15bn** |

**Every 100 schools licensing 100 pupils each: ₦45m a year.**

Official counts miss many private schools: a Lagos census found most were unregistered. In Lagos, 90% of primary schools are private, so Lagos is where we start.

Sources: Oxford Business Group (2023); National Bureau of Statistics (2016); Adam Smith Institute on the Lagos school census.

THE ALTERNATIVES

# Where Festival Town sits among the options

| Approach | Child does the task | No reading needed | Feedback on each answer | Whole class, one screen | Nigerian setting |
|---|---|---|---|---|---|
| Printed workbook | Yes | No | No | No | Varies |
| Video lessons | No, watches | Yes | No | Yes | Varies |
| Drill and quiz apps | Yes | Varies | Yes | No | Varies |
| **Festival Town** | **Yes** | **Yes** | **Yes** | **Yes** | **Yes** |

Typical for each approach, not a review of any one product. Festival Town is the only option here that does all five.

TRACTION

# Where the product is today

| Stage | Where |
|---|---|
| **Live** | Web, free, and Amazon Appstore (Fire TV) |
| **In review** | Google Play, Samsung TV and LG TV |
| **Submitted** | Web game portals, starting with Coolmath |
| **In build** | Festival Night, payments, school features |

**5**
places in the town

**15**
activities across STEM

**11**
voiced characters

**1,262**
spoken lines

THE TEAM

# Who is behind it

## Justin Ukaegbu

**Founder and Director**

- Degree in Computer Science and Education
- MA Design (Graphic Design), first class
- Over ten years in brand and product design, from WPP’s 141 Worldwide in Lagos to clients in the UK and Nigeria
- Leads Festival Town’s story, learning design, art direction, voices and build.

## MotionPlay Labs Ltd

UNITED KINGDOM

Company No: 17304660

66 Paul Street, London EC2A 4NA

NIGERIA

Registered with the Corporate Affairs Commission - No: 9621200

THE ASK

# What we are asking

**1**

## Schools

License Nursery 1 to Primary 2 from the January 2027 term, at ₦1,500 per pupil per term.

**2**

## Start small

Run a free four-week pilot in one class first. We measure skills before and after.

**3**

## Publishers

Publishers and school groups: book an audit of one textbook.

APPENDIX · FOR PARTNERS AND FUNDERS

# Investors are backing learning games for young children

| Company | What it makes | Round | Date |
|---|---|---|---|
| **Giant** (US) | Interactive storytelling for children | $8m seed | Feb 2026 |
| **Sparkli** (Switzerland) | AI learning expeditions for families and schools | $5m pre-seed | Jan 2026 |
| **ALPA Kids** (Estonia) | Learning games for ages 3 to 8 | Over €1m | Dec 2025 |
| **Polymath** (New Zealand) | Maths game with classroom and home versions | $1m pre-seed | Feb 2025 |

Polymath’s classroom version has pupils take turns when there are not enough devices. Festival Town’s TV play solves the same problem for larger Nigerian classes.

APPENDIX · DATA ROOM

# The data room

**Every document, one page**
motionplaylabs.com/festival-town/data-room

| Document | Status |
|---|---|
| Pitch deck (this deck) | Ready |
| Playable game, free in any browser | Ready |
| Website and promo film, 1 min 14 | Ready |
| Store listings: Amazon Appstore | Amazon live, others in review |
| Children’s privacy policy | Ready |
| Curriculum map and sample teacher guide | Ready |
| Pilot plan and before and after skills check | Ready |
| School licence agreement and price sheet | Draft |
| Company profile and certificates, UK and Nigeria | Ready |

Status as of 5 November 2026. MotionPlay Labs Ltd: England and Wales 17304660; Nigeria RC 9621200.
